Solutions by facility type

Ajax solutions currently protect over 1,500,000 facilities of any complexity across 169 countries. These range from fast food restaurants in Norway to scientific base in Antarctica, and from kindergartens in New Zealand to warehouses in the United States. Our scalable and easy-to-manage professional solutions cover security, comfort, video surveillance, fire detection, and water leak prevention, making them suitable for any type of facility.

SOUND SYSTEM SOLUTION

WE WILL DESIGN WHAT YOU
NEED

Home Cinema Sound System

A sound bar is a single speaker that is designed to enhance the audio quality of a TV, while a home cinema system includes multiple speakers and a subwoofer for a more immersive audio experience.

Sound System for Schools and Universities

Sound systems for schools and universities are designed to ensure that everyone in the building can hear a message loud and clear, whether it is delivered to the entire school or focused on the occupants of a room.

SOUND SYSTEM SOLUTION

Sound System for Masjid

A traditional mosque sound system is designed to support the daily prayers and other activities within the mosque. These systems are intended to provide clear, audible sound for broadcasting religious recitations, prayers, sermons, and other content within the mosque premises.

Sound System for Hospital

A modern hospital sound system is essential for clear communication and smooth operations. It delivers reliable audio for announcements, emergency alerts, and background music in patient areas. Integrated with hospital infrastructure, it ensures seamless communication across departments. This enhances the patient experience and improves staff coordination by enabling quick and clear announcements throughout the facility.

SOUND SYSTEM SOLUTION

Sound System for Hotels

A modern hotel sound system enhances guest experiences with clear, ambient music in lobbies, restaurants, and public spaces. It supports seamless announcements and event coordination. Integrated with the hotel infrastructure, it ensures smooth communication between staff. The system creates a comfortable, welcoming atmosphere, elevating the hotel's overall ambiance and service quality.

Sound System for Coffee Shop

A tailored sound system for coffee shops creates a cozy and inviting atmosphere with high-quality background music. It enhances the customer experience by delivering clear, balanced audio without disrupting conversations. Integrated into the café's design, the system ensures smooth control over music and announcements. This helps maintain a relaxed vibe, encouraging customers to stay longer and enjoy their visit.
